External Sketches – Hiding in both Part and Drawing Mode
Wildfire 2.0

External sketch used for extrusion – automatically hidden when used for extrusion
Mirror of entire part – external sketch is not hidden

Hide Mirror feature to hide the external sketch
If used as an Inheritance feature, geometry appears unhidden, even though the inheritance part has its all external sketches and mirrors hidden.

Note the model tree. You do not have a hide option for the External feature.

Show Layers, select PRT_ALL_CURVES and hide
This layer now hidden
At the drawing level, it doesn’t matter how the parent part appears, the sketches will show.

Show Layers and select PRT_ALL_CURVES

Hide this layer to remove sketches from the drawing
