Module 4, Procedure 1
Creating Boundary Surfaces

Module 4, Procedure 2
Creating Loft Surfaces

Module 4, Procedure 3
Using Multiple Curves as a Single Boundary
Module 4, Procedure 4
Creating a Blend Surface using the Radial Option

Module 4, Procedure 5
Creating a Blend Surface using the Uniform Option

Module 4, Procedure 6
Creating a Curve on a Surface Type Curve
Module 4, Procedure 7
Intersecting Surfaces to Create COS
After Task 3, Step 6

*Note that the model is shown in wireframe mode before selecting on the surface*

Module 4, Procedure 8
Creating a Curve using the Curve from Surface Tool

Module 4, Procedure 9
Manipulating COS Type Curves
*Task 3, Step 2. Curve is not DF-554 but the last curve in the list (the one you added).*
Module 4
Exercise 2

Note the model tree has been expanded for the wheel
