MET 296a
Mechanical Engineering Technology
Spring 2014

David R. Forsman, Senior Lecturer in Engineering
Office Phone: 898-6469
e-mail: drf6@psu.edu

Office and office hours: 213c REDC. Monday; 2:30 pm – 3:30 pm
Tuesday; 1:30 pm – 2:30 pm
Thursday; 4:00 pm – 5:00 pm
And by appointment

Course Title: Solids Modeling, Required Course for transfer students

Course Meeting Day, Time, and Location: By Arrangement

Course Description: Designed to bring transfer students up to speed using Solid Modeling software and enable them to transition into METBD 306.

Prerequisite(s): None

Textbook(s) and or other required material (supplemental/web pages):
Precision Learning (PTC)  http://store.ptc.com/promo/88128500
Web pages located at: http://engr.bd.psu.edu/forsman/

Course Objectives:

After completing the course the student should be able to:

1. Develop an overall understanding of how a parametric 3-D solid modeling system functions as opposed to a 2 or 3-D wire frame system.

2. Create parametric sketches that capture design intent.

3. Model extruded and revolved cuts, slots and protrusions.

4. Model sweeps and blends.

5. Create reference geometry such as planes and points.

6. Create patterns and mirror geometry.

7. Create assemblies of parts using bottom-up and top-down techniques.

8. Create detail drawings of parts and assemblies.
Topics Covered (outline):

Assignment 1: Intro to the Modeling Process, Understanding Concepts
Assignment 2: Using the Interface, Selecting and Editing
Assignment 3: Creating Sketcher Geometry, Using Sketcher Tools
Assignment 4: Creating Sketches for Features, Creating Datum Features
Assignment 5: Creating Extrudes, Revolves and Ribs
Assignment 6: Creating datum geometry and learning additional sketcher tools
Assignment 7: Internal Sketches, Embedded Datums, Sweeps and Blends
Assignment 8: Holes, Shells, Draft, Rounds & Chamfers
Assignment 9: Creating Drawings
Assignment 10: Drawing Annotations
Assignment 11: Copy/Group/Mirror, Patterns and Measuring
Assignment 12: Assembly

Class/Laboratory Schedule:
1 One hour fifty minute Lecture/Lab per

Relationship of course to program outcomes:
Support course designed to bring transfer students up to speed in the use of Solid Modeling Software and enable the student to smoothly transition into MET 306.

Prepared by and date of preparation:  David R. Forsman, 1/6/2014
**Grading Criteria:**
Assignments 100%

**GRADE SCALE:**
- A 93-100%
- B+ 87-89%
- B 83-86%
- C+ 77-79%
- C 70-76%
- D 65-69%
- F Below 65%
- A- 90-92%
- B- 80-82%

**Attendance Policy:** By Arrangement

**Makeup Policy:** Students who fail to attend will not generally be allowed to make up laboratories, quizzes, or exams unless a prior arrangement has been made. Note that in case of illness, funerals etc., the student is responsible to notify the instructor before the class begins and then must produce evidence which documents the absence.

**Academic Integrity:** Penn State Erie puts a very high value on academic integrity, and violations are not tolerated. Academic integrity is one of Penn State’s four principles to which all students must abide. Any violation of academic integrity will receive academic and possible disciplinary sanctions, including the possible awarding of an XF grade which is recorded on the transcript and states that failure of the course was due to an act of academic dishonesty. All acts of academic dishonesty are recorded so repeat offenders can be sanctioned accordingly. Students are encouraged to review more information on academic integrity which can be found at: http://www.pserie.psu.edu/faculty/academics/integrity.htm

**Support Services:**
- Learning Resource Center: http://pennstatebehrend.psu.edu/academic/lrc/index.htm
- Library: http://www.behrend.psu.edu/academic/library/index.htm
- Computer Center: http://www.behrend.psu.edu/compcntr/compindex.htm

**Lab Safety:** Not Required (Computer Lab)

**Course Policies and Procedures:**
- You are expected to strive to produce neat and accurate work. There is no excuse for sloppy or poorly prepared assignments. A failing grade may be assigned for the course if all assigned work is not satisfactorily completed.
- Academic dishonesty is a violation of the "code of ethics" which guides the engineering profession. This is a serious offense, and will be treated as such. The first offense warrants a written warning, and a "zero" for the assignment. Any subsequent violation may result in a failing grade for the course, and further disciplinary action by University Officials.
- Documentation: Just as industry, where all job related documentation must be accessible by other people related to a project, all computer related course work must be available for instructor review on the P: drive. Create a new subdirectory (NOT under
the Private directory) labeled MET_296_a and place all your work for this class in this location. The purpose of this is for the following: If you have any questions regarding your assignment, you can stop by the instructors’ office (or e-mail him) and he can quickly map your drive space to bring up your work to be better able to answer your questions. In addition, while grading your assignment (the documentation which is usually turned in on paper), if there are any questions relating to your documentation, the instructor can access your files to resolve any questions. All computer files for the assignment must remain accessible on disk until the assignment is returned to the student. If the instructor needs to check the data files and these files do not exist in the MET_205 subdirectory, then the worst case scenario will be assumed. If you keep files on a pen drive, you must also upload these files to the MET_205 subdirectory on your P drive! Do not create the MET_205 subdirectory under the Private directory and then move it. If you do this, all the read/write permissions still are associated with the directory and the instructor will not have access!

Note to students with disabilities: Penn State welcomes students with disabilities into the University's educational programs. If you have a disability-related need for modifications or reasonable accommodations in this course, contact the Disability Specialist in the Office of Student Affairs, Room 115 Reed Union Building, 898-6111.

Evening Exams, if any: Does not apply.
