Why:
This exercise is provided to help you practice and improve your visualization skills. Engineers must be able to identify views and surfaces correctly in order to communicate conceptual ideas.

Learning Objectives:
- Re-enforcement of view identification.
- Re-enforcement of surface identification.
- Re-enforcement of identifying the correct view.

Performance Criteria:
- Properly identify the correct views and surfaces.

Resources besides Class Notes, Other Students, Instructor, Textbook, and Past Hands-Ons:
- SI
- Tutors
- Visualization study session

Plan:
2. While points are given, the assignment(s) will not be graded. (This is because the quiz program will not allow your instructor to set the correct answer to zero points.)
